

In this userguide, we will demonstrate how to establish a connection with your personal banking institutions. A connection is a direct link with an institution that feeds over updated account information.

1. From your homepage, click Organizer.

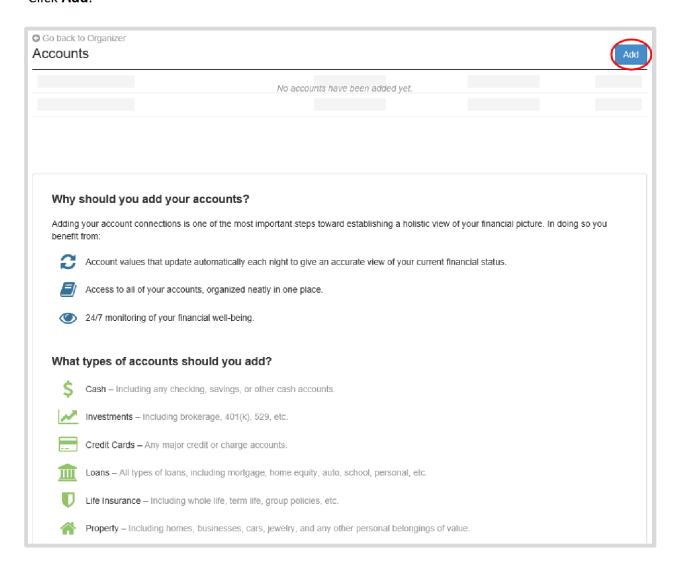

2. Click Accounts.

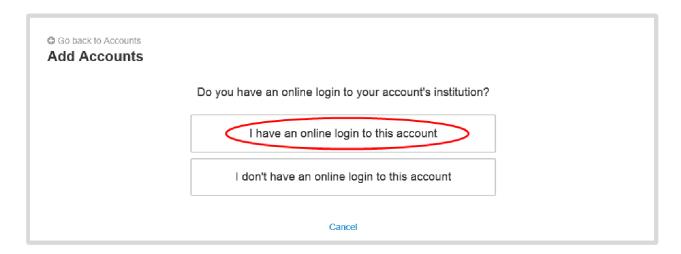

Review the information on why you should add accounts, and what type of accounts you should add. Click Add.

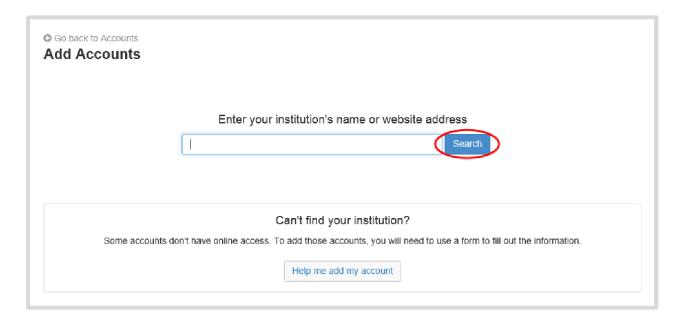

4. Select whether or not you have an online login for this account.

Please Note: If you do not have an online login for this account, the application will help you add the accounts manually.

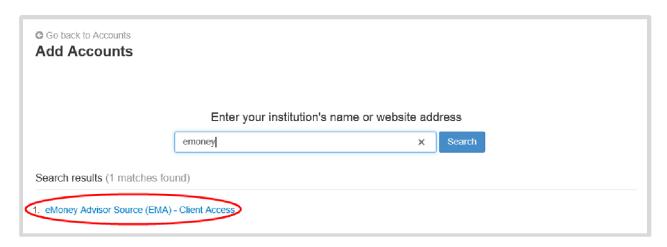

5. Enter the institution's name or website address and click **Search**.

6. From the search results found, select the appropriate link.

7. Next you will acknowledge the institution notice where applicable. This notice will inform you of any important information relating to this institution's connection. Click **Continue**.

Acknowledge Institution Notice

Source Purpose

The purpose of this source is to demonstrate establishing a Client Connection.

Status Screen Summary

The current screen will be used on any source in the eMoney Advisor system. It is designed to fulfill one of the following:

Educate users on any known maintenance issues.

Explain any unique set-up steps for a source

Explain why accounts are not updating during certain time periods

Other source specific information

Please instruct the users to review this section prior to calling or reporting a problem on a Connection that is in error. Please note, a connection to this test source may be removed at any time.

Explain why accounts are not updating during certain time periods

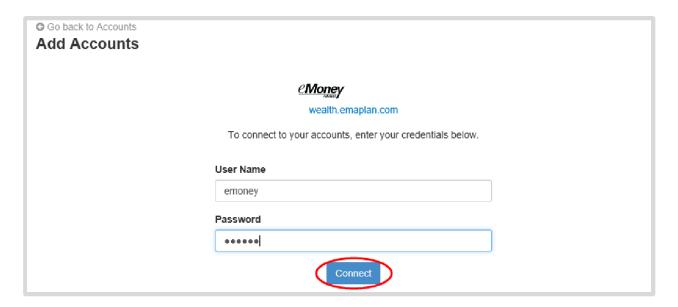

Other source specific information

Please instruct the users to review this section prior to calling or reporting a problem on a Connection that is in error. Please note, a connection to this test source may be removed at any time.

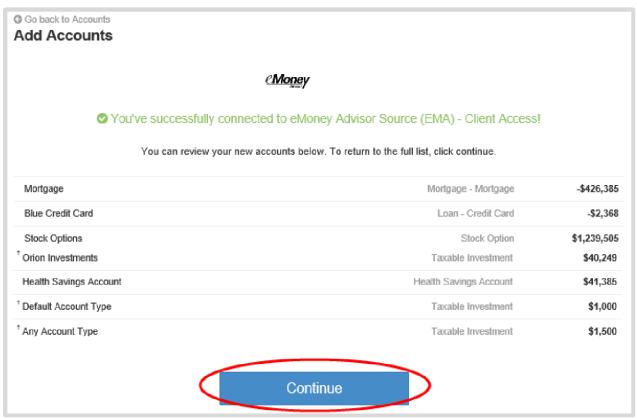

8. Enter in your login credentials for this institution and click **Connect**. If there's an issue connecting to your accounts, you'll receive a status message describing the problem. Click on the message to learn how to fix it.

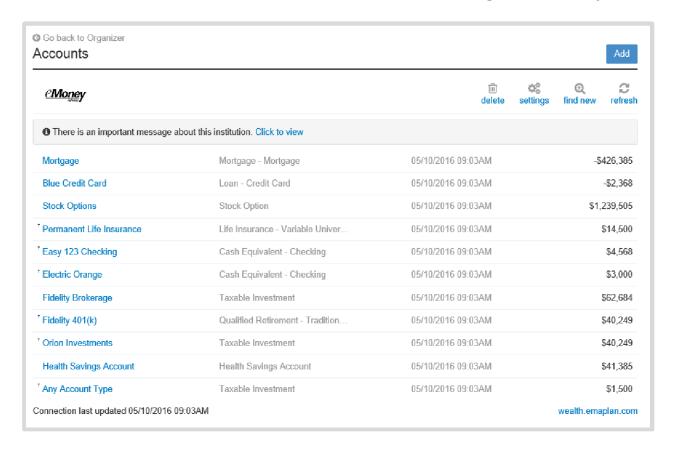

9. Once your credentials have been verified you can review the accounts brought over through the connection. Click **Continue** to return to an overview of all accounts you have entered into your portal.

10. On the Accounts page you can easily see when your accounts with an institution last updated or if any accounts are in an errored state.

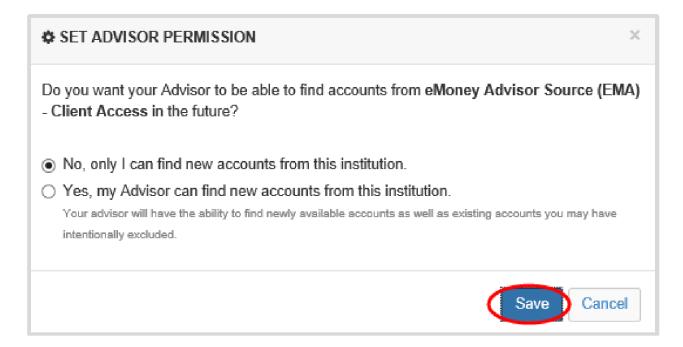

11. Each connection you establish will have its own specific maintenance required. For example, if you updated your password on the institution you will need to then update the credentials in your portal.

You can **Delete** the connection, **change your settings, find new accounts**, and **refresh** the connection at any time to pull over updated account values.

12. The settings link gives you the option to enable your Advisor to find new accounts on your behalf.

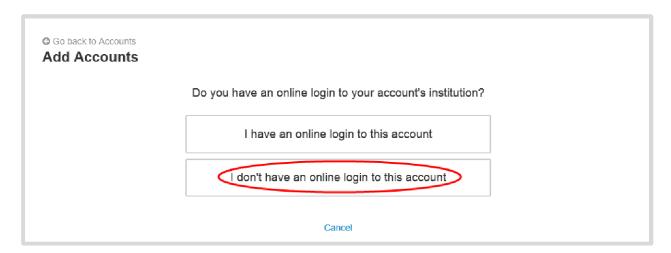

If you do **not** have an online login to an institution, follow the below steps to enter accounts in manually. While manual accounts do NOT update, they help build a better financial snap shot for both you and your advisor.

1. Click Add on the Accounts page.

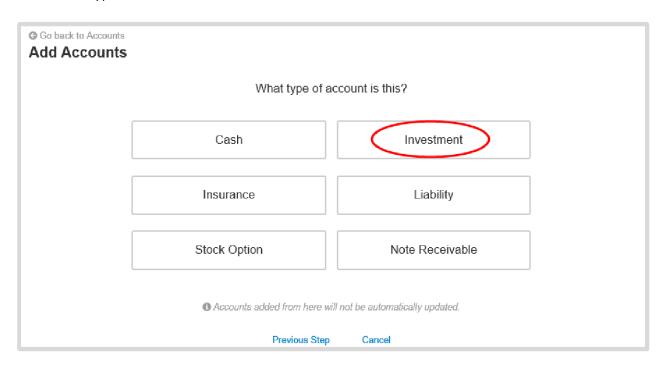

2. Select "I don't have an online login to this account."

3. Select the type of account.

4. Enter details about the account and click Save.
